\* This stat is the shooter's average based on the number of targets for the events the shooter has attended.

\*\* This stat is not entirely accurate. I do not have the ability to know which station each shooter started on. Without that information there is no way to determine precisely how many stations were ran consecutively. That said, this stat is tracked as if everybody started on Station 1 at each shoot. It will continue to accumulate from one shoot to another. For example, if a shooter ran the last two stations on shoot #1 and the first two stations on shoot #2 then dropped a target on shoot #2 station #3 this would count as four consecutively ran stations. \*\*\* Explantion for Most Improved Shooter is near the end of this report.

# 2025-2026 CanAm

How would you determine which station was the "Hardest" at a shoot? I guess it would be easy to just look at the station average. Is that really the way? What about how many times people ran a station? I think it's a combination of both the lowest station average and the number of times the was station ran. For example, if the lowest station average was a .532, and the number of people who ran the station was, 17 the station rating would be 17.532. If the next lowest station average .562 and only 1 person that station, the station rating would be 1.562. To me that would be the "Hardest" station at that shoot. If you disagree, I'll ask again, how would you determine which station was the "Hardest" at a given shoot?

# 2025-2026 CanAm

## Shoot Rating from Hardest to Easiest

The shoot rating from hardest to easiest is determined by the average score of the top 20 shooters at each event. Also, as previously stated in this report the Station Rating is a combination of how many times a station was ran plus the average number of hits on the station at the given shoot.

### How the Station Rate is determined

|                |         |
|----------------|---------|
| #of times ran  | 1.000   |
| Station Avg    | + 0.562 |
| Station Rating | 1.562   |

## 2025-2026 CanAm

**Most Improved Shooters +/- score:**

Most Improved Shooter +/- is determined by first comparing your score against the **League Average** score at each event. That will establish your **Individual Shoot +/-**. Your **League +/-** is determined by finding the difference between the **Individual Shoot +/-** scores from shoot to shoot. Everybody's first League +/- is a zero. This is your starting point. Then your first shoot is subtracted from your second shoot and so on. That difference is your **League +/- score**. Your League +/- scores are added together to find your overall **League +/-** score. A large positive number means there was improvement. A large negative number means.... well it means you bombed...

Our first shooter's name for this example is Sir R. U. Crushinem. The second shooter's name is Dustin Clays

## Reasons For Missed Targets

### Shotgun Shell Anatomy

I normally shoot high brass, I  
normally shoot low brass.  
This brass ain't even brass...  
These shells did not get sized right.

## **Reasons For Missed Targets**

Shooter A:

I think I was over that one  
I think I was below that one

Shooter B:

Nah.. You were below it  
Nah.. You were over it

**Did I "miss" any reasons gang? You be sure and let me know if I did!**

## The Weather

It was too cloudy

The clouds moved and the sun came out it changed the lighting

**It was too sunny**

The wind is blowing the targets around too much

The wind is blowing my shot around

The wind is blowing the shot and the targets around too much

There is no wind its messing me up

It's too cold for this crap!

My foot slipped because the stand is icy

Can't move my fingers

That target did not stop when my gun did

Its too warm for shooting

I was looking at the bead

You slow pulled me

I didn't call for the target

I wasn't ready when I called pull
